按照豆包生成的 Python for 语句练习

```
fruits = ["apple", "banana", "cherry"]
for fruit in fruits:
                                                                             (week06)
                                                                             xuan@LAPTOP-00K17TT3 MINGWe
$ python flow_controls.py
apple,ok
banana,ok
                                                                                         PTOP-00K17TT3 MINGW64 ~/repo/week06 (main)
    fruit += ",ok'
                                                                             cherry, ok
     print(char)
                                                                             h
for i in range(5):
person = {"name": "John", "age": 30, "city": "New York"}
for key, value in person.items():
                                                                             name: John
                                                                            age: 30
city: New York
(0, 0)
(0, 1)
(1, 0)
(1, 1)
(2, 0)
for i in range(3):
          print(f"({i}, {j})")
                                                                             (2, 1)
                                                                                 an@LAPTOP-00K17TT3 MINGW64 ~/repo/week06 (main)
```

主要语句直接打在 py 文件里了
